Artiferi

Artifer

La lavorazione del ferro battuto Ż per Artifer una tradizione familiare che risale alla fine dell'ottocento. Come azienda nasce nei primi anni sessanta e diventa ben presto leader del settore nella produzione in serie di manufatti in ferro battuto per scale, cancelli, recinzioni, inferriate.

Nuovi stimoli commerciali e una crescente richiesta di ampliare la gamma dei

propri prodotti ha portato Artifer ad impegnarsi nella realizzazione di una nuovissima e sofisticata linea di arredo in vero Ferro Battuto, da non confondere con ci  che oggi viene comunemente proposto come tale: ogni pezzo Ż lavorato a mano e questo caratterizza l'irregolarit  e l'asimmetria di alcuni articoli.

La capacit  manuale degli artigiani, l'estro creativo dei designers uniti a pi  di 40 anni di esperienza danno vita a manufatti come tavoli, sedie, divanetti, poltroncine e complementi che si contraddistinguono per leggerezza e armonia delle forme.

Le lavorazioni artigianali, la scelta dei trattamenti anticorrosivi e delle finiture ci permettono di offrire un prodotto di pregio ed altissima qualit .

*Wrought iron processing is for Artifer a family tradition dating back to the end of the Nineteenth-century. The company was born in the early sixties and soon became a sector leader in the mass-production of wrought iron manufactured articles for stairs, gates, fences and grates. New commercial spurs and a growing demand for enlarging the range and diversifying the products, led Artifer to engage in carrying out a completely new and sophisticated furnishing line in **real Wrought Iron** which has not to be mistaken for what today is commonly such called; each piece is hand-worked and this is what characterizes the unevenness and asymmetry of some articles. The manual skill of our artisans, the inspiration of our designers together with more than 40 years of experience, liven up manufactured articles like tables, chairs, coaches, armchairs and accessories characterised by their lightness and harmony of shapes.*

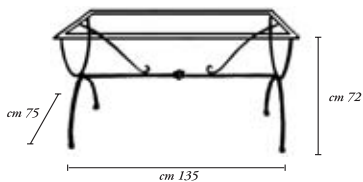

The artisan working, the choice for anticorrosive treatments and the finishes are such that we can offer a valuable and very high quality product.
